Cempaka launched in 2006 with husband and wife team David and Lesley Campbell. David spent many years in the hotel industry in both Europe and Asia and Lesley's background in marketing and interior design ensures that we are more than just a furniture manufacturer. Having lived and worked in locations including Japan, Africa, Singapore, USA and London founders David and Lesley Campbell have been inspired by diverse cultures and design influences that led them to create Cempaka based in the beautiful island of Bali. We are inspired every day by the beauty around us and the skills of the artisans we work with.

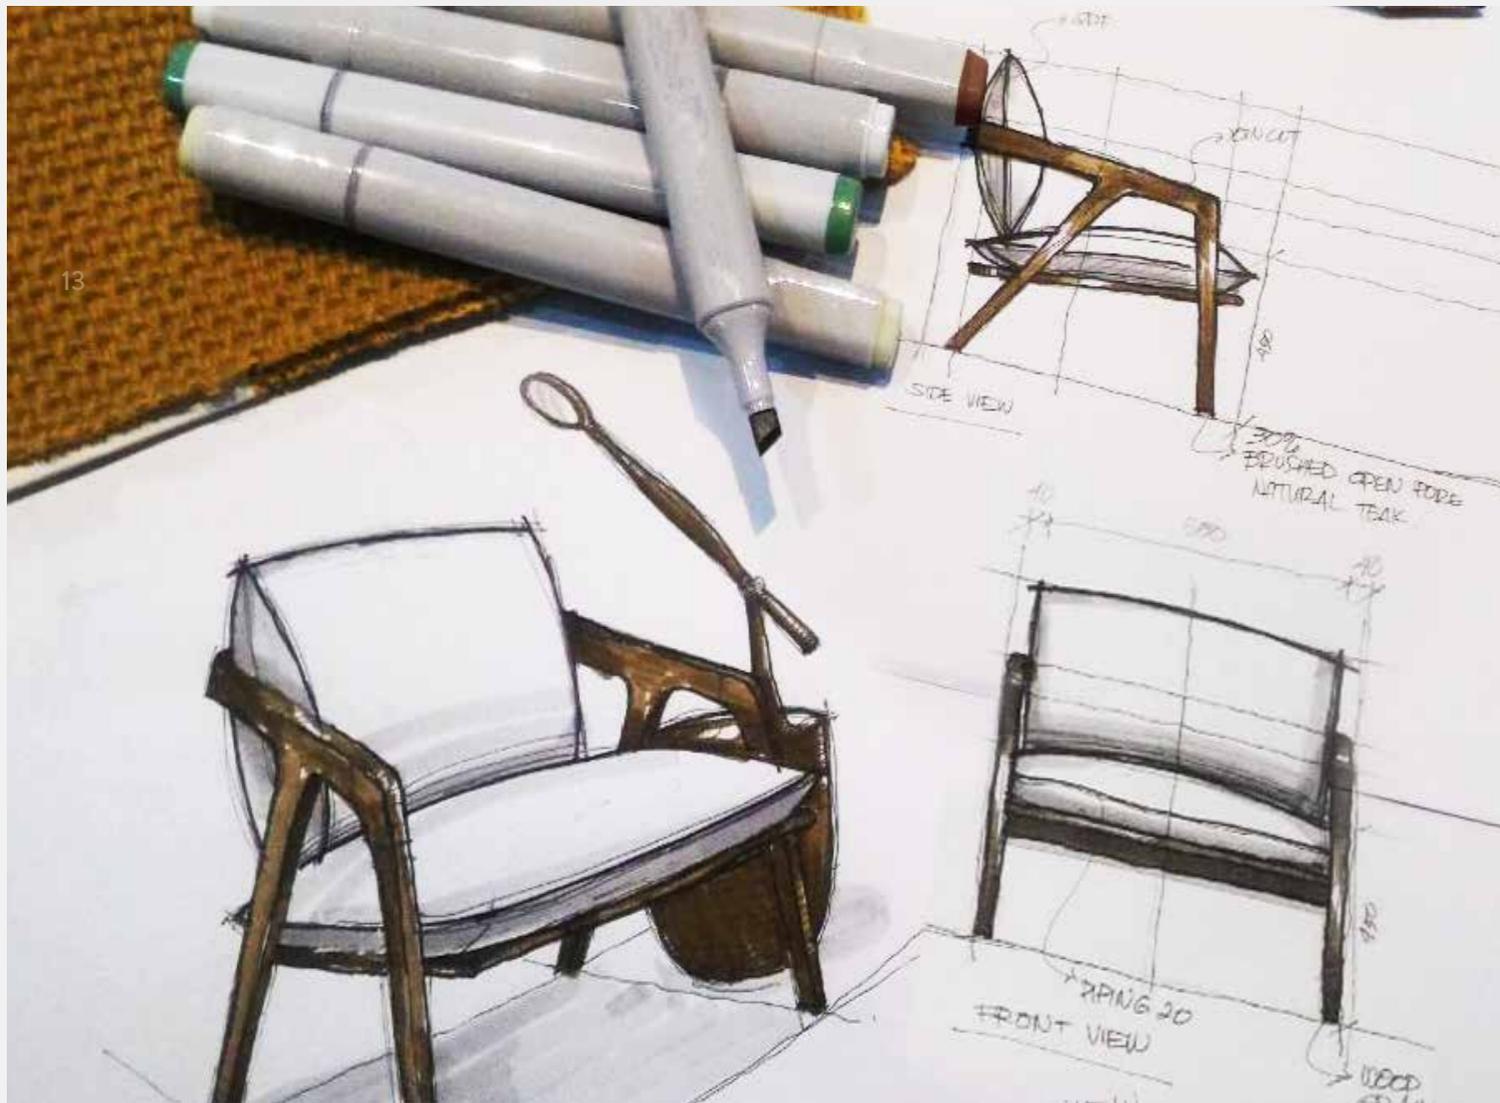

We pride ourselves in our close attention to detail and professionalism that helps us to produce the finest possible furniture. We use only the best quality materials and hardware, and will always utilize the best possible finishes to match clients' design vision and budget. The quality itself is only part of the story - we also see it as paramount that the client feels confident and is well informed and regularly updated. We assign a dedicated project coordinator to manage each individual client, so help and updates are only one call away...

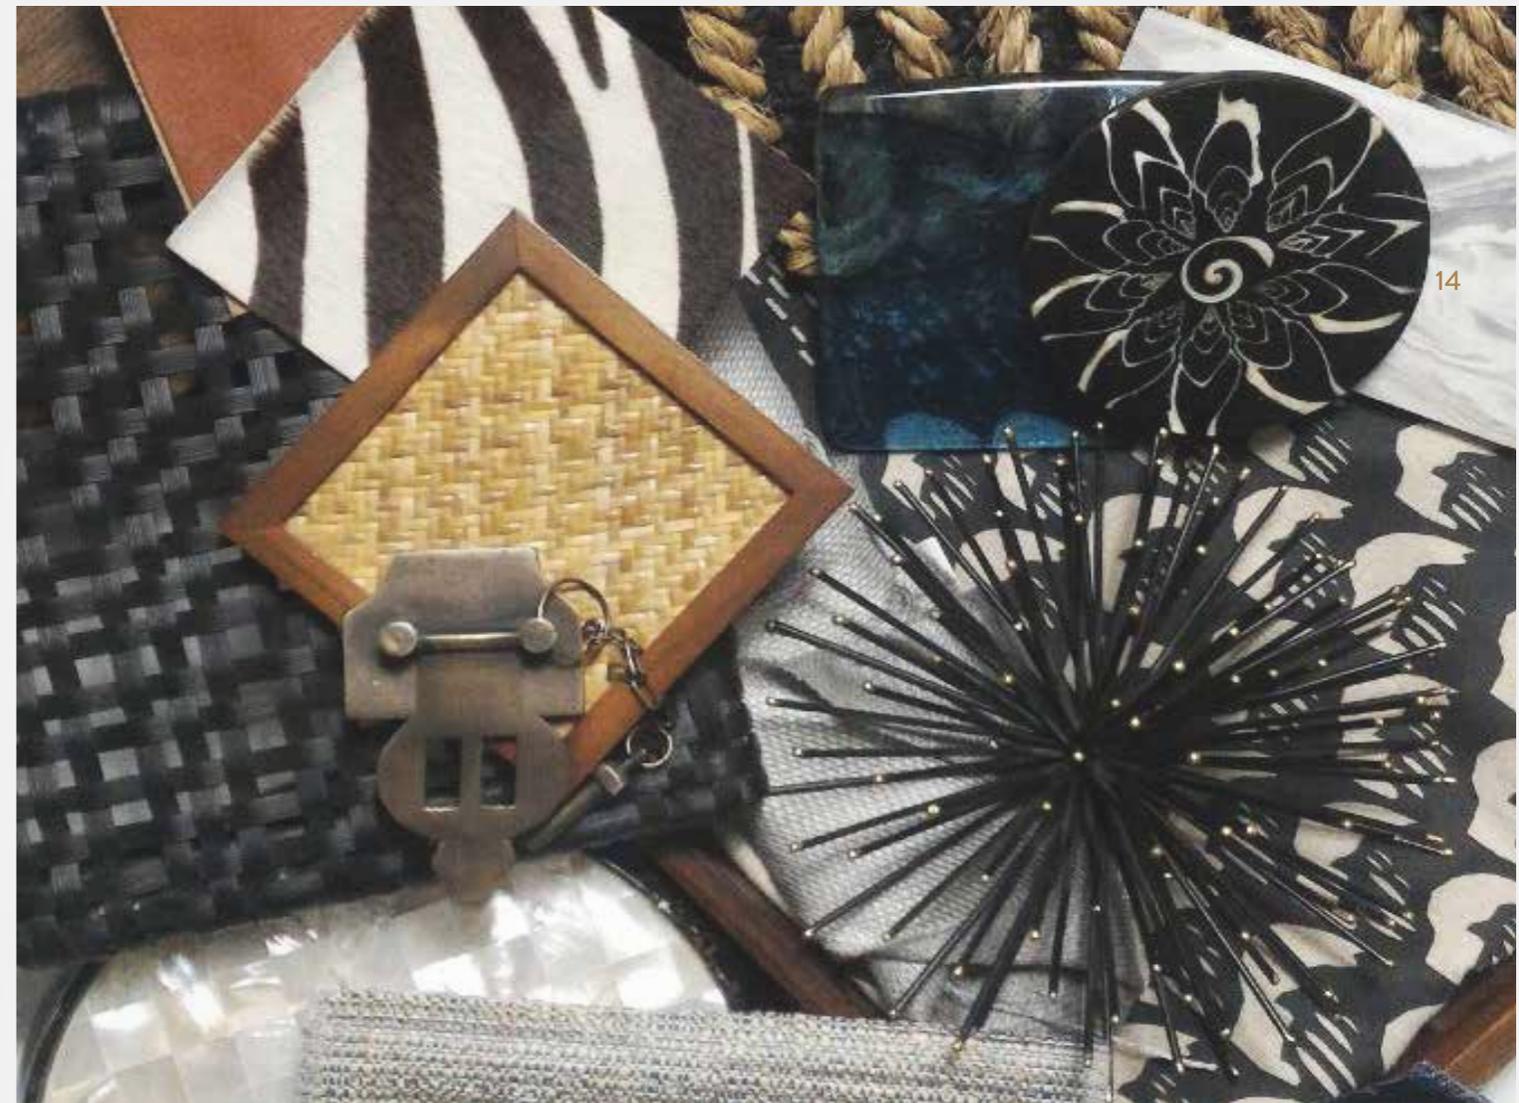

Our vision is to work with interior designers, operators and developers to create exquisite furniture and innovative designs with a commitment to international service and quality standards. From beach resorts in the Maldives, Chateaux in France, luxury tropical hotels in Bali, city hotels in Tokyo to penthouses in London we work across a variety of styles and materials but with a single minded commitment to quality and service excellence.

Using sustainable materials like plantation mahogany, oak and sustainably sourced teak combined with exquisite finishing like lacquer, brass, raffia, pen shell and artisanal skills like hard carving ensure that our furniture is beautiful and unique.

Design Development

Any successful project involves delivery of the project within budget with high quality goods and on time delivery. We pride ourselves in our ability to respond to the varied needs of designers, hospitality developers, operators and procurement companies. Whether you need veneer case goods, hand painted furniture, inlays or detailed marquetry, we have proven quality resources in place. In every case we prepare detailed construction drawings and specifications and then oversee the production process to ensure that your product will withstand the rigours of hospitality usage while delighting guests with exquisite finishing and detailing.

Sampling, prototypes and MUR

We develop furniture pieces with the special finishes, textures and materials you require. From a sketch or design reference we develop and prepare CAD drawings and technical specifications, provide finishing samples and then prototypes for mock up rooms. Once prototypes are approved only then do we proceed with full production.

Production Capability

16

For over a decade Cempaka has been working to create luxury furniture for the most discerning clients worldwide. Our factory has the capability of creating one-off exquisite accent pieces for a luxury residence or full furniture supply for a 5 star 400 room hotel.

Production Capability 25 X 40” containers per month
Auto Cad and 3 D

Modern machinery combined with artisanal hand finishing

Access to over 400 skilled furniture professionals

Meet The Team

We have a highly skilled team of furniture designers, CAD experts, projects managers and quality assurance specialists to ensure that your project is managed efficiently with great results and on time delivery

Finishes Development

We work with interior designers to develop the perfect finishes that not only look good but will stand up to the rigours of commercial usage.

Material Selections

We work with clients to select the best weaves and raw natural textures that will withstand the high traffic exposure of a resort. Our R and D specialists study the suitability of each material and finish for every project.

“We pride ourselves on our attention to detail in delivering beautiful furniture to create unique and luxurious projects.”

“The difference between something good and something great is attention to detail”
